

Spécifier les véhicules d'occasion certifiés dans XPO / Specify Certified Pre-Owned Vehicles in XPO (Hyundai Canada)

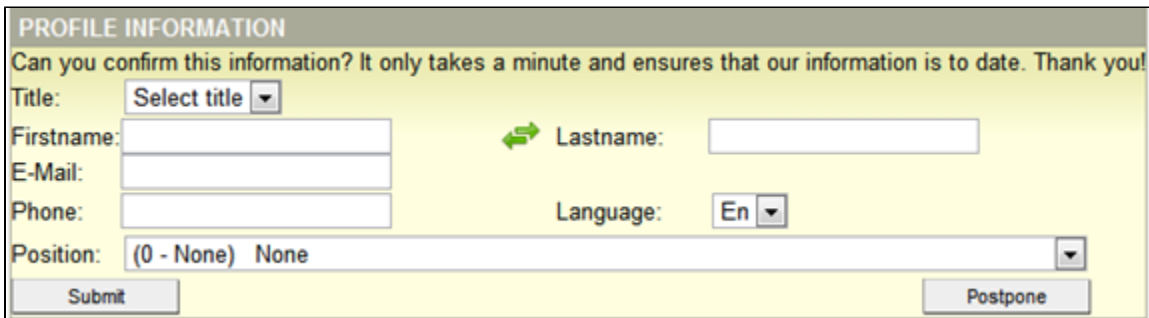

EVOLIO provides Hyundai Canada with a tool that automatically imports the data of used vehicles in a software called XPO. Once the information is imported in XPO, you must access it to choose which vehicles are considered as Certified Pre-Owned (CPO). After specifying CPO vehicles in XPO, the corresponding vehicles will be labeled with a Hyundai Certified logo on your Website.

This document describes the steps to follow to specify the **Hyundai Certified** option to the corresponding vehicles once they have been imported in XPO.
